Amendments to the Specification

2. In line 2 of the specification amendment filed on July 24, 2006, please replace the phrase "supporting multiple data threads, a data cache (not shown)" with --supporting multiple data threads and a data cache (not shown)--.

Reasons For Allowance

3. The following is an examiner's statement of reasons for allowance:

Yoshida, U.S. Patent No. 5,390,307, has taught an apparatus for a multi-data store or load instruction for transferring multiple contiguous storage locations in one transfer operation.

Mallick et al., GB2321984A has taught a processor that is able to read from or write to multiple registers in a single cycle of operation.

Higaki et al., EP0764900A2 has taught a processor for transferring data to/from multiple registers using short instruction words.

IBM Technical Disclosure Bulletin XP 000109942 has taught performing a parallel long move instruction in parallel with subsequent instructions.

Art Unit: 2183

Plant et al., IBM Technical Disclosure Bulletin XP 002333145 has taught specialized hardware for quickly determining a number of bytes to be loaded or stored.

The prior art of record has not taught, either individually or in combination, a scheduler for managing access to multiple hardware streams according to a priority record regardless of any priority with multiple data threads coupled with multiple hit/miss predictors, each being associated with a corresponding hardware stream, and each configured to forecast whether the associated stream will hit/miss the data cache prior to the instructions of the stream being dispatched.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
